Computer Networking From Lans To A local-area network (LAN) is a computer network that spans a relatively small area. Most often, a LAN is confined to a single room, building or group of buildings, however, one LAN can be connected to other LANs over any distance via telephone lines and radio waves. A system of LANs connected in this way is called a wide-area network . The difference between a LAN and WAN is that the wide-area network spans a relatively large geographical area. What is LAN?
